Re: Lake Tapps Water Right

Dear Sir:

This letter is in response to your request for comments concerning the draft report of examination for the Lake Tapps water right.

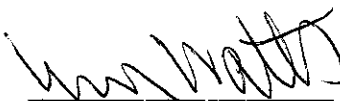

Fall City Water District is not contracted to receive any water from Lake Tapps and has no foreseeable need for water from Lake Tapps.

While we have not seen the water system comprehensive plan for the ultimate holder of the Lake Tapps water right, we can't imagine how it could show the conveyance of water to the Fall City area. The Fall City Water District has not engaged in any planning that would involve the conveyance of Lake Tapps water to the Fall City area.

Please omit the water service area of the Fall City Water District from the area of use in the report of examination for the Lake Tapps water right. The District's service area is located within the following

sections: Sections 1, 2, 3, 4, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 20, 21, 22, 23, 24, 26, 27, 28, 29, 33, and 34 of Township 24 North, Range 7 East, W.M., and Sections 7, 18, and 19 of Township 23 North, Range 7 East, W.M., King County, Washington.

Sincerely,
Fall City Water District
Board of Commissioners
